

# OUR SUCCESS IS MEASURED IN FEET

## FOOTWEAR COLLECTION

We understand that everyone requires different safety features. We understand that comfort and protection is paramount and you want durability that exceeds expectations. Our footwear is at the forefront of the safety industry, not just because of all of our safety features, but because it draws a line between those who have our footwear and those who don't.

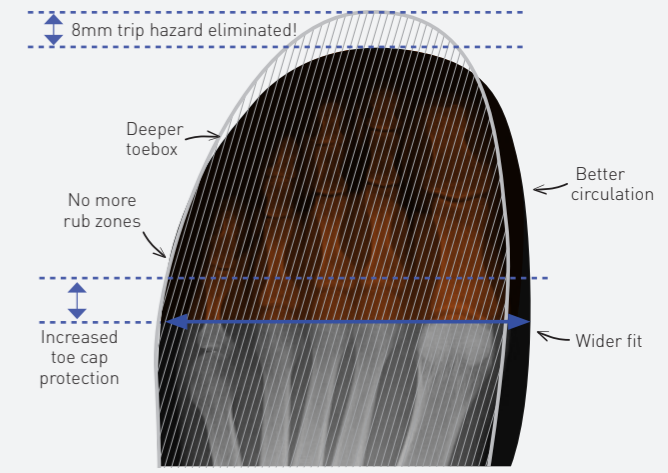

Boots: XTZ-100 BLA

# OTHER BOOTS FOLLOW IN IT'S FOOTPRINT

## EXTRA-WIDE FIT FOR THE BROAD FOOT

We created a comfortable, broad last shape to enable wearers with broader feet to reduce their standard boot size (length), eliminating the permanent 8mm toe trip hazard for each size reduction. This also means greater comfort, with a lighter boot and increased toe cap protection.

## DELIVERS MAXIMUM GRIP ON ALL SURFACES

We formulated a Bison Grip nitrile rubber sole, with a multi-directional tread pattern, that is more grippy than any other boot we tested in both wet and dry conditions. Plus we added a rocker heel and toe, and a forward pitch, reducing heel strike slip risk, and further reducing wearer fatigue.

## ENHANCED LONG-TERM WEARER COMFORT CUSHIONING

We've added a state of the art footbed with athletic arch support, compression resilient cushioning and an innovative use of channels and holes to enhance air circulation around the foot.
